

## ABOUT

Go2Care provides safe and secure virtual access to physical therapists, occupational therapists, and other wellness health specialists through the use of everyday technology. Go2Care treats and manages common physical conditions remotely through the use of evidence-based applications.

## NETWORK

Our specialty provider network extends across the U.S states and into international marketplaces. Providers are credentialed and specially trained in telehealth services.

## HOW IT WORKS

Go2Care uses an analytical triage system called iRAP to determine which health conditions are appropriate for self-service education, remote treatment, or referral to an on-site provider. This process creates a cutting-edge, cost- efficient care solution that ultimately improves client access to timely, expert care. Clients simply create an account, login, complete the iRAP which establishes length and type of service and provider and then book an appointment. Clients receive highly personalized care, reports, education, equipment recommendations, and access to advanced rehab specialists.

## Virtual rehabilitation and prevention by Physical and Occupational Therapists and Wellness Experts

### COMMONLY TREATED CONDITIONS

1. **Non-Surgical Injuries** (Joint & Muscles, Sprains and Strains, Sport Medicine)
2. **Post-Surgical Orthopedic Conditions** (Spinal, Hip, Knee, Shoulder, and Hand)
3. **Pain Management** ( Acute, Chronic, Pre/Post Surgery or Injury)
4. **Chronic Disease Management** (Diabetes, COPD, Heart Disease, Depression)
5. **General Medicine** (Post Amputation, Senior/Age related, Muscle Weakness, Balance, Self -care)
6. **Neurological** (Stroke Recovery, Parkinson's, Multiple Sclerosis, Dementia/Alzheimer)

# Cost Shifting

Go2Care meets the rehab needs of the growing concierge market

## 72%

Reported reduction in hospital admissions for patients utilizing concierge medicine.

## 54%

Millennials report that they shop online for health care first. Health care providers are shifting business models to include new trends.

## 1.5 M

1.5 Million people per year are paying for concierge care. Forbes reports major hospitals are moving into market.

Patient rehabilitation and desired outcomes do not need to be limited by geographic barrier or money.

## SOLUTIONS

Manage common conditions without needing to visit a clinic. Go2Care offers international patients full access to the Go2Care Health Portal for the treatment and management of common physical ailments by U.S Providers. Additionally, Go2Care offers customized programs focused on preparing for and recovering from orthopedic surgical procedures.

**Telerehab provides access to physical and occupational therapists on demand using any modern technology with a camera.** If you have a prescription for therapy or are simply looking to improve comfort and physical function, our providers are ready to see you. While most common physical rehab conditions can be addressed through Go2Care's platform, we identify issue circumstances too complex for effective, remote treatment. This program includes Initial iRAP Triage, which determines appointment length and number of visits expected to provide best outcomes at lowest cost. Virtual treatment can include: Initial Evaluations, Pain Management, Therapeutic Exercise Programs, Care Plans, Post-Operative Care, Durable Medical Equipment, Wellness, Physical Agent Modalities, Brace Recommendations/Ordering, and more.

**Surgical Rehab Packages improve outcomes for common orthopedic procedures including TKA, THA, Revisions.** Progressive joint mobility & strengthening programs for pre and post-operative care improve surgical outcomes. Our platform includes remote patient monitoring & education tools that can be customized by surgical providers to enhance care compliance and progress tracking. This program includes self service access to our platform where patients obtain their initial Rehab Surgical Packages, following a screen of medical complexity. The toolsets include Instructional Handouts; Electronic Attachments, Daily Surveys & Alerts, Audio/Visual Demonstration and Health Management Guidelines. Whether bridging a care gap or providing comprehensive treatment, Go2Care has you covered.
